Three different outputs guarantee a flexible solution for every audio chain. A line level RCA output can be connected to a pre-amplifier for purest signal, a dedicated variable output can be connected to active speakers or power amplifiers. The optical output can further pass a digital signal to an external DAC. The Stream Box S2 comes fully equipped with TIDAL and Spotify. With the implementation of Shairport we were even able to give iDevice users out there another possibility to send data to the Stream Box S2. Friends of internet radio will find satisfaction in TuneIn.
