The CM608 two-way built-in low impedance loudspeaker is "the reference loudspeaker". It can be used with a standard hi-fi amplifier and provides you with a Pro HiFi sound.

The loudspeaker has an enforced 6 ½" woofer and 1" tweeter. It makes the CM608 very suitable for the distribution of background music. The housing is made of high quality ABS and the woofer is made out of polypropylen, what makes it moisture-proof.

This loudspeaker is easy to install, due to its simple, quick mounting system (3 screws which are hidden behind the loudspeakergrill, which gives the loudspeaker a modern and striking design).
