Dimensions (assembled) 705 x 282 x 158mm
Weight 980g
Construction Thermoplastic frame with acoustic foam

Citronic MIS-705P Mic isolation Screens

Foldable microphone isolation screens for recording vocal passages at close range without unwanted noise spill or room ambience. Each is loaded with acoustic foam to absorb unwanted reflections and can be mounted onto a mic stand with standard 3/8" thread and adjusted to the necessary width. A small microphone mounting post is provided which also has a 3/8" thread for mounting any standard mic holder onto. Designed for project studios and podcasters, where a clear voice track is critical.
