Mackie DL16SE - Digitalna mikseta

Šifra: 19762
Kategorija prozivoda: Digitalne Miksete
Proizvođač: MACKIE

Cena: 1.762,00 KM

Command Your Mix
The Mackie DL16SE digital mixer delivers proven mixing power with legendary Onyx+ mic preamps in a stage-friendly, rack-mountable design made to withstand real-world abuse. Connect to your wireless router and get mixing quickly with the industry-leading, multi-platform Master Fader SE app. Create stunning multitrack recordings and get playback for a virtual soundcheck via USB I/O. Loaded with per-channel and output DSP plus 4 FX processors, DL16SE gives you all the mixing power you need for proven professional sound.

Master Fader SE
Master Fader SE is the main user interface for your DL16SE and DL32SE digital mixer. Rather than knobs, faders and buttons on a large piece of hardware, you get powerful mixing tools on your tablet, Mac or PC - up to 20 different devices simultaneously. The proven design of the Master Fader SE app makes managing your mix, large or small, easy and efficient. Organize your channels with view and mute groups, utilize subgroups with full bus processing, control levels of channel groups simply with VCAs, and even lock out devices from specific capabilities within the app. And when you get a mix you like, you can save it all into a snapshot.

Powerful Processing
From EQ to compression, every bit of signal processing is implemented with the highest quality possible to maintain the fidelity of each source. Every channel and output bus gets its own dedicated processing.

The 4-band parametric EQ on each channel and output features a dedicated high-pass filter (plus low-pass on the outputs), modern and vintage modes, and built-in RTA for maximum versatility and detailed analysis of each source. The clear UI makes it easy to make adjustments, view settings and choose presets.

Each FX processor features tons of studio-quality reverbs and delays plus effects like chorus, tremolo, flanger and sweep filter. Fine tune each effect with advanced parameters and EQ — and since each processor has its own send and return, you won’t use up any other busses.

CONNECT TO YOUR WI-FI ROUTER OF CHOICE
Connect Mackie DL16SE or DL32SE to a wireless router and control via Master Fader SE on up to 20 different iOS, Android, macOS and Windows devices at once. Wireless control also means you can put the mixer and router where it makes the most sense for application, while judging the sound from anywhere on the floor.

MAIN FEATURES
Convenient stagebox/rack design with built-in handle

16 input channels with Onyx+ preamps (8 XLR, 8 XLR/TRS combo with 2 Hi-Z)
8 fully assignable XLR outputs plus headphone output
Connect to your wireless router and control with Master Fader SE app
Per-channel EQ, filters, gate, compression and RTA/Spectrograph
4 stereo FX busses with studio-quality reverbs, delays, chorus and more
Multitrack 16x16 USB audio interface for recording and playback
Waveform OEM professional software and plugins included

WIRELESS MIXING
Take complete control via iOS, Android, macOS or Windows devices
No set FOH position — mix from anywhere
Control from up to 20 separate devices at once
Access Limiting allows performers to control their own monitor mixes without giving access to critical mixer functionality
Universal Ethernet connection supports your wireless router of choice

POWERFUL PROCESSING & ROUTING
16 preamps with 4-band PEQ + HPF, gate, compression and RTA/Spectrograph
16 stereo-linkable input channels plus stereo return channel
8 output busses with 4-band PEQ + HPF/LPF, 31-band GEQ, comp/limiter, alignment delay and RTA/Spectrograph
6 stereo-linkable aux sends
6 stereo-linkable subgroups
Main L/R bus
6 VCAs and 6 mute groups
4 stereo FX processors featuring studio-quality reverbs, delays, choruses, flangers and many more with dedicated sends and returns
Full I/O routing with A/B sources per channel
Assignable oscillator including pink/white noise and sine waves
Modern and Vintage options for comp/gate and EQ

MULTITRACK RECORDING & PLAYBACK
16x16 USB 2.0 audio interface for Mac or PC
Record the show for later mixdown
Perform a virtual sound check
Play intermission music, backing tracks and more directly into a dedicated stereo return channel
Flexible, low-cost studio recording solution
Utilize Mac or PC audio plug-ins in a live environment

MASTER FADER SE CONTROL APP
Intuitive and easy to master
Fast navigation with view groups and overview
Quick setup with tons of factory and user-definable presets
Access Limiting allows flexible customization of the user interface and prevents unwanted adjustments from other users
Quickly access channel processing, signal routing and a massive suite of great sounding effects with presets to get you started
Export presets, shows and complete system backups via Dropbox, email and more
Set up the show before you arrive at the venue with offline show creation
Available on iOS, Android, macOS and Windows

RECORD & PRODUCE LIKE A PRO
Waveform™ OEM professional software and plugin packages included
The DAW Essentials™ Bundle for Waveform OEM includes 16 powerful plugins like Equalizer, Compressor, Reverber8 and Limiter
